Visual chocolate machine

application

Several fluids commonly used in equipment: glue, paint, chocolate, candy syrup, jam and other flowing liquids.

Features:

- Thickened integrated granite stone bearing platform, the machine is stable and precise;
- Double 400*300 large working platforms, left and right circulation loading and uninterrupted operation, efficient and time-saving;
- Matrix LED light source lighting, bright and soft, clear and accurate photos;
- win7 (10) 64-bit Chinese/English operating system, easy to understand, learn and use;
- 360-degree panoramic vision can position and identify the system. Products can be placed at will, without the need for molds and fixtures;
- Supports simultaneous production of multiple templates and multiple types of products, intelligent and efficient;
- Panoramic images are used to create feature templates and panoramic workpieces are visually programmed, greatly improving programming operability and convenience;
- The product is highly intelligently set up and does not require separate calibration or correction;
- Dual camera platform, one program can be easily copied and can also be edited and modified separately;
- Supports bad board detection, automatically identifies defective products or products that do not require ordering, saving production costs;
- Non-contact high-precision injection valve can carry out precise dispensing of small flow rates in small gaps;
- The core components of the whole machine are from first-line brands, which are stable and durable;
- The signal wire is made of shielded wire, which has strong anti-interference.
