Product Description

Chencai silicone vulcanizing machine features a custom heating system that ensures uniform heating of silicone raw materials, resulting in phone cases that are free from deformation and color discrepancies after molding. Lens holes and button positions are precisely aligned, with a fit that far exceeds that of ordinary equipment, helping to create premium-quality phone cases.

It features an automatic mold-ejection design, automatically ejecting the mold after vulcanization, ensuring high production efficiency and easily handling peak season order pressures.
